

# Caballos del Pirineo

## RECOMMENDATION

- Take it easy. This is an experience to be enjoyed without haste. The journeys are easy and you will have time enough to finish them. If you do it calmly, you will realize that this experience with the animals will be one of the most amazing experiences you can have in the wildness.
- Bring with you enough water. Much of the paths visit several springs, but depending on the season they must be dry. Don't be scared to bring too much water... donkeys are loading it!
- Our donkeys are well trained to show you all their patient and docility. But if they suddenly stop and don't want to walk anymore is because any reason! Look around you, what are they looking at, find what is scaring them and let them know that all is under your control. Give them confidence and they will follow you.
- Donkeys can load no more than 40 Kg. Please, be nice and respect the limit.
- Here, in the mountains, the temperature can change so much during the day. Bring your coat with you, and your raincoat, just in case.

## REGULATIONS

Respect the animals! It is specifically forbidden to hit, hurt or cause any pain to our donkeys. If you see any cruelty against our animals, please, let us know it!

In this experience you must not ride the donkeys. The animal will be your companion and will load all your equipment. Any person riding the donkeys will do it under his/her own responsibility (or under their parents/legal tutors) and after signing an agreement concerning this topic.

Caballosdelpirineo wish to keep the rural heritage and to maintain the ancient, close relationship between donkeys and mankind.
